**First Quarter Ended April 30, 2009**

**Dated: June 29, 2009**

**Metropolitan Mining Inc.**  
**Form 51-102F1**  
**Management Discussion and Analysis**  
**For the First Quarter Ended April 30, 2009**  
**Dated as at June 29, 2009**

---

*This discussion and analysis should be read in conjunction with the audited financial statements and the related notes therein for year ended January 31, 2009 and the unaudited interim financial statements and related notes thereto for the three months ended April 30, 2009 (the "Financial Statements"). The financial information in the MD&A is derived from the Company's Financial Statements prepared in accordance with Canadian generally accepted accounting principals. All amounts in the Financial Statements and this discussion and analysis are expressed in Canadian dollars, unless otherwise indicated.*

**FORWARD LOOKING INFORMATION**

This management discussion and analysis ("MD&A") contains certain forward-looking statements and information relating to Metropolitan Mining Inc. ("Metropolitan" or the "Company") that are based on the beliefs of its management as well as assumptions made by and information currently available to Metropolitan. When used in this document, the words "anticipate", "believe", "estimate", "expect" and similar expressions, as they relate to the Company or its management, are intended to identify forward-looking statements. This MD&A contains forward-looking statements relating to, among other things, regulatory compliance, the sufficiency of current working capital, the estimated cost and availability of funding for the continued exploration and development of Metropolitan's exploration properties. Such statements reflect the current views of Metropolitan with respect to future events and are subject to certain risks, uncertainties and assumptions. Many factors could cause the actual results, performance or achievements of Metropolitan to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements.

**DESCRIPTION OF BUSINESS**

Metropolitan Mining Inc. ("the Company") was incorporated on July 16, 2007 under the Business Corporations Act of British Columbia and is engaged principally in the acquisition, exploration and development of mineral resource properties. Since incorporation, the Company has, amongst other matters: completed a round of seed financing; entered into an option agreement to acquire up to a 60% interest in a mineral property in Argentina; completed an initial public offering; obtained a listing on the TSX Venture Exchange; and performed exploration work on the Fruso property, Salta, Argentina which is the subject of the option agreement entered into by the Company. A summary of these transactions is set out below.

Effective October 18, 2007, the Company entered into a letter of understanding with Argentine Frontier Resources Inc. ("AFRI") outlining the principal terms for an option agreement in respect of the Fruso mineral property (the "LOU") comprised of the two claims in the province of Salta, in northwestern Argentina, Fruso Este and Aracar, comprised of 5,684 Hectares (the "Fruso Property").

A formal option agreement was entered into on March 31, 2008 (the "Option Agreement") between the Company, Salta Exploraciones S.A. ("SESA") and AFRI, (collectively with SESA and AFRI as the "Optionor") whereby the Company has an option to earn up to a 60% interest in the Fruso Property by completing the following within 3 years of March 31, 2008, the Effective Date of the Option Agreement:

**Metropolitan Mining Inc.**  
**Form 51-102F1**  
**Management Discussion and Analysis**  
**For the First Quarter Ended April 30, 2009**  
**Dated as at June 29, 2009**

---

- (i) spending mineral exploration expenditures of up to US\$1,250,000 on the Fruso Property, subject to incurring qualifying exploration expenditures of no less than US\$250,000 in any one year;
- (ii) making cash payments of US\$250,000 as follows: US\$25,000 which was paid upon receipt of a National Instrument 43-101 report on the Fruso Property (the "43-101 Report"); US\$25,000 of which US\$15,000 was paid in March 2009 with the remaining US\$10,000 due on or before July 31, 2009; and US\$200,000 upon exercise of the option to acquire a 60% interest in Fruso Property and entering into a joint venture; and
- (iii) issuing to AFRI a total of 200,000 Common Shares, which Common Shares were issued on March 31, 2008, at a deemed price of \$0.20 per Common Share.

Pursuant to the Option Agreement, upon incurring qualifying exploration expenditures on the Fruso Property within three years from March 31, 2008 of not less than US\$500,000, US\$333,333.33 and US\$416,666.67, respectively, the Company has the right to earn a 20%, 40% and 60% interest, respectively, in the Fruso Property.

Effective November 24, 2008 the Company, AFRI and SESA amended the Option Agreement to extend the date for completing the qualifying exploration expenditures such that the expenditure requirement of US\$333,333 for the second year following the Effective Date was extended from March 31, 2010 to July 31, 2010 and the expenditure requirement of US\$416,667 for the third year following the Effective Date was extended from March 31, 2011 to July 31, 2011. In addition, all qualifying exploration expenditures made by Metropolitan on the Fruso Property will be deemed to be cumulative and any amount over the minimum amount of qualifying exploration expenditures spent in any one year may be carried over and counted against the minimum qualifying exploration expenditures required to be made in the following or subsequent years.

In the event that the Company will have earned up to a 60% interest in the Fruso Property, then the Optionor and the Company agree to associate on a joint venture basis for further exploration and development of the Fruso Property and to contribute to all further costs including exploration and development in accordance with their respective interests in the Fruso Property.

As at April 30, 2009, the Company had incurred approximately US\$608,681 of qualifying expenditures, earned a 20% interest in the Fruso Property and exceeded the minimum qualifying expenditures required to maintain the option in good standing for the two year period ended July 31, 2010.

The Company may terminate the Option Agreement at any time upon 30 days' written notice to the Optionor and subject to certain requirements as set out in the Option Agreement. In the event of default by the Company in the performance of all or part of the requirements as set out in clauses (i), (ii) and (iii) above, the option and the Option Agreement will terminate provided that any rights to the Fruso Property acquired by the Company shall be retained and remain with the Company.

**Management Discussion and Analysis**  
**For the First Quarter Ended April 30, 2009**  
**Dated as at June 29, 2009**

---

As of June 6, 2008 the Company became a reporting issuer in the provinces of Ontario, Alberta and British Columbia. Effective July 15, 2008, the Company completed an initial public offering of 3,000,000 common shares (the "Offering"), at a price of \$0.30 per common share, for gross proceeds of \$900,000

On July 18, 2008, the common shares of the Company were listed and called for trading on the TSX Venture Exchange under the symbol "MNZ".

**THE FRUSO PROPERTY**

The Fruso Property is located in the province of Salta in northwestern Argentina, approximately 15 kilometres east of the Chilean border and 25 kilometres north of the railroad to Antofagasta, Chile. It is located 350 kilometres by all-weather road west of Salta and 50 kilometres by secondary roads northwest of the village of Tolar Grande.

The Fruso Property is accessed by all-weather roads 350 kilometres from Salta. The final 70 kilometres from the village of Tolar Grande is by secondary gravel roads. Access to all parts of the Fruso Property is readily obtained by all terrain vehicles. The Fruso Este claim adit and Rio Tinto 1997 drill sites can be accessed by existing gravel roads. Travel time from Salta is about two days surface travel, with an overnight stop over at Tolar Grande.

The nearest town to the Fruso Property is Tolar Grande where accommodation, telephone, meals and limited services can be found. Manpower resources, both skilled and labour, are obtained in Salta. A new 120 kilovolt power line crosses Argentina approximately 50 kilometres to the northwest. Local generation of electric power is required. No public airstrips are available, but a private airstrip is reported at the Taca Taca Abajo Fruso Property 35 kilometres to the south. Service from Salta to Antofagasta by means of the Chile railway that passes approximately 25 kilometres south of the Fruso Property was terminated in 2006, but may be restarted. Water resources are sparse. A small spring is located on the Fruso Property, but adequate water for exploration purposes can be obtained from a larger spring on the northeast side of Salar Taca Taca.

Topography is gentle, with rolling rounded hills interspersed with broad Salar-filled valleys. Intrusive rocks underlie more rugged terrain, with local relief attaining 500 metres. The physiography of the Puna resembles that of the Basin and Range province of the southwestern United States, with block faulting generated by Andean stage deformation. Rock exposure is fair to good. Vegetation is limited to grasses and low shrubs in widely spaced wet areas.

Notes: 1) The Company was incorporated on July 16 2007 . There was no business activity other than financing until the 4<sup>th</sup> quarter of Fiscal 2008.

**RESULTS OF OPERATIONS**

The Company reported a net loss for the three months ended April 30, 2009 of \$78,376 compared with a net loss of \$79,901 for the previous quarter. Management and consulting fees remained stable at \$18,000 for the period which was in line with the previous quarter and the corresponding 2008

**Metropolitan Mining Inc.**

**Management Discussion and Analysis**  
**For the First Quarter Ended April 30, 2009**  
**Dated as at June 29, 2009**

---

quarter. Accounting fees increased to \$11,313 compared to \$7,281 for the previous quarter due to year-end audit requirements. There were no travel and accommodation expenses incurred in the period. Filing and listing fees were \$5,000 during the quarter (2008:\$7,500). Office, telephone and miscellaneous expenses remained at minimal levels, totaling only \$1,336 (2008: \$938). Audit and professional fees of \$1,400 recorded for the three month period ended April 30, 2009 (2008: \$12,500) are expected to increase significantly in the second quarter upon receipt of audit billing fees for year ended January 31, 2009.

Interest income of \$700 during the first quarter was lower than the \$2,298 reported during the previous quarter due to the reduction in cash on deposit and lower interest rates.

Non-cash charges for the period were comprised of \$21,955 in stock-based compensation expense related to the 1,800,000 stock option granted in April 2008. A corresponding amount was added to contributed surplus resulting in no change to total shareholders equity.

As an exploration stage company, there is no source of operating income and losses are expected to continue. Net loss, quarter over quarter, is affected by the level of general exploration and project investigation expenses undertaken during the period.

## **LIQUIDITY AND CAPITAL RESOURCES**

By the end of the first fiscal year, namely January 31, 2008, the Company had raised \$722,754 through the sale of 8,779,001 Common Shares. Effective July 15, 2008, the Company raised an additional \$900,000 (net \$819,000) through its initial public offering of 3,000,000 Common Shares.

Working capital as of April 30, 2009 was \$331,797 compared to \$391,611 as at January 31, 2009.

		April 30, 2009		January 31, 2009
Working capital	\$	331,797	\$	391,611
Deficit	\$	490,987	\$	412,611

By January 31, 2009 the Company had accounted for all of the drilling costs under the Phase I Drill Program with Connors Argentina S.A., support services provided under the SESA/AFRI services agreement, as well as all camp demobilization, drill site reclamation costs and the cost of assays and reporting. Although management considers its current cash position to be more than sufficient to meet minimum exploration and maintenance expenses required on the Fruso Property and cover administrative and corporate commitments through Fiscal 2010, the Company has no income producing assets, therefore additional financing will be required to fund any significant further exploration programs or new property acquisitions.

See "Risk and Uncertainties" and, in particular, the sub-sections, entitled "Exploration and Development", "Loss of Interest in Properties" and "Financial Capability and Additional Financing".

**Metropolitan Mining Inc.**  
**Form 51-102F1**  
**Management Discussion and Analysis**  
**For the First Quarter Ended April 30, 2009**  
**Dated as at June 29, 2009**

---

**EXPLORATION AT FRUSO**

Under the terms of the original LOU, the Company agreed to spend a minimum of US\$100,000 on a pre-defined exploration program on the Fruso Property to facilitate the preparation of a technical report in the form required by National Instrument 43-101 (the "43-101 Report"), by an independent qualified consulting geologist, recommending further exploration work on the Fruso Property at a cost of at least U.S. \$200,000.

SESA carried out a program of geological mapping, rock and soil geochemical sampling in 2006. Further geochemical surveys were carried out by SESA personnel prior to the signing of the LOU by SESA and the Corporation on October 18, 2007. Work by the Company under the LOU started in late October 2007 - nine trenches were excavated and sampled - and a geophysical survey was completed by Quantec on December 1, 2007. The geophysical survey consisted of 9.9 line-kilometers of grid, line spacing 250 meters, and dipole length 100 meters.

The Company entered into a drilling contract on September 18, 2008 (the "Drilling Contract") with Connors Argentina S.A. ("Connors"), a subsidiary of Boart Longyear, in anticipation of carrying out its Phase I exploration program (the "Program") on the Fruso Property, as recommended by Kenneth Dawson, Ph. D., P. Eng., of Terra Geological Consultants, in the 43-101 Report prepared by him. Boart Longyear Limited (ASX: BLY) reportedly operates in 35 countries. The Program was originally proposed to consist of 6 – 8 HQ drill holes, of approximately 300 – 400 metres in depth, to test the mineralization potential of a copper porphyry system at an estimated cost of US\$585,000. The Company engaged Terra Geological to oversee the Program and work with the Optionor of the Fruso Property, AFRI and SESA, who had agreed to manage the exploration program and to carry out related services for the Company.

In general terms, progress at Fruso did not proceed as anticipated, in large part due to mechanical difficulties and breakdowns incurred with the drilling rig. Of the holes drilled to the conclusion of the program, Hole 2 was drilled to a depth of 72 metres before having to be abandoned due to technical difficulties, Hole 2A was drilled to a depth of 169.5 metres, Hole 3 was drilled to a depth of 400 metres and Hole 4 was drilled to a depth of 400 metres. The Company originally anticipated drilling six holes in 30 – 35 days, but based on the average number of metres drilled per day being well below forecast, the project was behind schedule and, without adjustment, would have exceeded the Cdn\$583,096 figure set out in the Company's Prospectus dated June 6, 2008. In addition, the dramatic rise in the U.S. dollar, which is the currency of the drilling contract, contributed to further increases in the Canadian equivalent cost of the Exploration Program.

As a result of these developments, Metropolitan provided Connors and SESA with a notice letter dated October 31, 2008 that the Exploration Program would be finalized on completion of drilling Hole 4 and that the Fruso camp would then be de-mobilized.

Core samples were assayed at Acme Labs in Mendoza, Argentina using 32-element ICP-ES and Fire Assay on elevated Au samples. As reported in the Company's news release dated January 9, 2009:

**Metropolitan Mining Inc.**  
**Form 51-102F1**  
**Management Discussion and Analysis**  
**For the First Quarter Ended April 30, 2009**  
**Dated as at June 29, 2009**

---

“Copper is present as the secondary minerals neotocite and chalcocite, and primary copper minerals have been oxidized at the depths intersected. Gold values ranged up to 383 ppb or about 0.4 g/t, but averaged about 10 ppb. Mo and Ag values are low. Drill intersections indicate that copper values increase with depth and to the west. Drilling by Rio Tinto in 1998 to the west and northwest of the current drilling intersected similar copper values under a capping of recent basalt. Additional drilling in this area is recommended.”

As of April 30, 2009, the Company had incurred or accrued \$794,348 of exploration and related expenditures on the Fruso Property, which included USD\$40,000 in option payments and the issuance of 200,000 common shares to AFRI at a deemed value of \$0.20 per share.

	April 30, 2009	January 31, 2009

### **CRITICAL ACCOUNTING ESTIMATES**

A detailed summary of all of the Company’s critical accounting estimates is included in Note 2 to the Financial Statements.

### **CHANGES IN ACCOUNTING POLICIES**

The Company has provided disclosure of the adoption of new accounting standards in Note 2(i) to the Financial Statements.

### **RISK AND UNCERTAINTIES**

Exploration for mineral resources involves a high degree of risk. The cost of conducting programs may be substantial and the likelihood of success is difficult to assess. The recovery of the Company’s investment in resource properties and the attainment of profitable operations are dependent upon the discovery and development of economic ore reserves and the ability to arrange sufficient financing to bring the ore reserves into production. The ultimate outcome of these matters cannot presently be determined because they are contingent on future events including but not limited to the following:

**Metropolitan Mining Inc.**  
**Form 51-102F1**  
**Management Discussion and Analysis**  
**For the First Quarter Ended April 30, 2009**  
**Dated as at June 29, 2009**

---

**Exploration and Development**

The Fruso Property is in the exploration stage and there are no known commercial quantities of mineral reserves on the Fruso Property. The purpose of the Offering referred to herein is to raise funds to carry out exploration and development with the objective of establishing economic quantities of mineral reserves. There can be no assurance that any economic quantities of mineral reserves will be discovered on the Fruso Property.

**Political and Regulatory Framework in Argentina**

In the past, Argentina has been subject to political instability, changes and uncertainties, which may cause changes to existing governmental regulations affecting mineral exploration and mining activities. The Company's operations and the Fruso Property are subject to a variety of governmental regulations including, among others regulations promulgated by the province of Salta in northwestern Argentina with respect to water rights. Argentine regulators have broad authority to shut down and/or levy fines against facilities that do not comply with regulations or standards. The Company's mineral exploration and mining activities in Argentina may be adversely affected in varying degrees by changing government regulations relating to the mining industry or shifts in political conditions that increase the costs related to the Company's activities or maintaining its properties. Operations may also be affected in varying degrees by government regulations with respect to restrictions on production, price controls, export controls, income taxes, expropriation of Fruso Property, environmental legislation and mine safety. There can be no assurance that changes in the laws of Argentina or changes in the regulatory environment for mining companies or for non-domiciled companies in Argentina will not be made that would adversely affect the Company. It is also possible that current or future social unrest in Argentina will adversely affect the Company's operations. In addition, Argentina's status as a developing country may make it more difficult for the Company to obtain any required financing for its projects.

**Chile's Economy: History of Instability and Future Instability and Uncertainty**

The Company's Fruso Property is situated close to the Chilean border. Historically, Chile's economy has suffered periods of instability, which include high inflation, capital flight, default on international debts, and high government budget deficits. Results of these problems included domestic disturbances and riots, government resignations and instability in the currency and banking system. Such disorder in the future could have adverse effect on the overall economy of the region and make it difficult or impossible for the Company to operate effectively in Argentina and may require the Company to reduce or suspend its operations in Argentina.

**Loss of Interest in Properties**

Pursuant to the Option Agreement, the Company has the obligation to incur exploration and development expenditures in order to maintain and/or earn its interest thereof. The Company's ability to maintain its interest in the Fruso Property may be dependent on its ability to raise additional funds by equity financing. Failure to obtain additional financing may result in the Company being unable to make payments required or satisfy its expenditure obligations and could result in a delay or postponement of further exploration and the partial or total loss of the Company's interest in the Fruso Property.

**Metropolitan Mining Inc.**  
**Form 51-102F1**  
**Management Discussion and Analysis**  
**For the First Quarter Ended April 30, 2009**  
**Dated as at June 29, 2009**

---

**Permits and Government Regulations**

The future operations of the Company may require permits from various governmental authorities and will be governed by laws and regulations governing prospecting, development, mining, production, export, taxes labour standards, occupational health, waste disposal, land use, environmental protections, mine safety and other matters. There is no assurance that the Company will be able to obtain all necessary permits and approvals that may be required to undertake exploration activity or commence construction or operation of mine facilities on the Fruso Property or any other properties the Company may acquire in the future.

**Title Risks**

Although the Company has exercised the usual due diligence with respect to determining title to the Fruso Property, there can be no assurance that the Company's rights or interests in and to the Fruso Property will not be challenged, impugned or revoked. The Company's rights or interest in and to the Fruso Property may be subject to prior unregistered agreements or transfers or native land claims and title may be affected by undetected defects. If title defect exists, it is possible that the Company may lose all or a portion of its rights or interest in and to the Fruso Property. Until competing rights or interest to the Fruso Property have been determined, there is no assurance as to the validity of the Company's rights or interest to the Fruso Property.

**Financial Capability and Additional Financing**

The Company has limited financial resources and has no source of operating income. There is no assurance that future funding will be available to the Company for further exploration and development of its Fruso Property. There is no assurance that the Company will be able to obtain sufficient financing in the future on terms acceptable to it. The ability of the Company to arrange additional financing in the future will depend, in part, on the prevailing capital market conditions as well as the business performance of the Company. Failure to obtain additional financing on a timely basis may cause the Company to postpone or abandon exploration and development of its Fruso Property, forfeit its rights to the Fruso Property or reduce or terminate its operations.

**Difficulties in Conducting Business through Foreign Branch Office**

The Company has completed the first phase of registering a branch office in the province of Salta in northwestern Argentina. As such, the Company is able to conduct business through the Argentine Branch office should it choose to do so. The branch has no employees and no exploration or operating activities have been conducted through the branch to this point and there is no assurance that the Company will continue to maintain a registered branch in Argentina. Any limitation on the transfer of cash or other assets between the Company and the Argentine Branch or the perception that such limitation may exist now or in the future, could have an adverse impact on the Company's valuation and the price of its Common Shares.

**Metropolitan Mining Inc.**  
**Form 51-102F1**  
**Management Discussion and Analysis**  
**For the First Quarter Ended April 30, 2009**  
**Dated as at June 29, 2009**

---

**Currently Limited Trading Market for the Common Shares**

Effective July 18, 2008, the common shares of the Company commenced trading on the Exchange, under the symbol "MNZ". Since listing, there has been a public market for the Company's Common Shares, but limited liquidity. The listing of the Common Shares on an exchange, market or other quotation system is not a guarantee of liquidity. An active public market for the Common Shares might not develop or be sustained. If an active public market for the Common Shares does not develop, the liquidity of a shareholder's investment may be limited and the price of Common Shares may decline below the initial public offering price.

Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, then actual results may vary materially from those described on forward-looking statements. The Company has not completed a feasibility study on any of its properties to determine if they host mineral resources that can be economically developed and profitably mined.

A more detailed listing of the Risks and Uncertainties associated with an investment in the Company is available in the Company's Prospectus dated June 6, 2008 which is available on SEDAR at [www.sedar.com](http://www.sedar.com).

**LEGAL CLAIMS AND CONTINGENT LIABILITIES**

As at the date of the MD&A, there were no material legal claims or contingent liabilities outstanding.

**RELATED PARTY TRANSACTIONS**

During the three months ended April 30, 2009, the Company:

- (a) paid or accrued \$18,000 (2008: \$18,000) of management fees to directors and officers of the Company.
- (b) paid or accrued \$11,312 (2008: \$4,625) of accounting fees to an officer of the Company.

As at April 30, 2009, an amount of \$10,828 (2008: \$8,625) was owed by the Company to directors and officers related to expenses and services provided, which is included in accounts payable and accrued liabilities.
